Ari,

Regarding the below, for #1 there is no file, and the answer is no to both in #2.

Thx,

B. Parker Berry

Subject: RE: Dr. Morrison Supplemental Report [IWOV-BUTLERSNOW.FID7560002]

Hi Parker,

Thanks for the below. A few follow up questions.

(1) Can you provide a file which links the cluster assignments for the K-Means test (i.e., outputs of the analysis) to the respective election years?

(2) Did Dr. Morrison, or the individuals working for him, run K-Means cluster analysis on voter turnout rates? Or Fisher's exact test on voter registration rates? If so, please provide the results for those tests.

Thanks,

Ari

Subject: Dr. Morrison Supplemental Report [IWOV-BUTLERSNOW.FID7560002]

Casey,

For Dr. Morrison's Supplemental Report, we are advised that there is no "code" for the K-Means Cluster Procedure. NCSS uses "boxes" and "point and click" to run procedures, which are listed in the output as "commands." The URL to the NCSS "K-means cluster analysis" (https://www.ncss.com/wp-content/themes/ncss/pdf/Procedures/NCSS/K-Means_Clustering.pdf) sets forth how the K-means cluster procedure operates in NCSS, along with a copy of the attached NCSS output which shows the "commands" on the last page.

The same is true for the Fisher's exact test. It is implemented as a point-and-click procedure in SPSS 25. Below is a link on how to do the test in SPSS

<https://ezspss.com/how-to-do-fisher-exact-test-in-spss/>
